Version 1

Jurgen Appelo jurgen@noop.nl www.noop.nl November 7, 2008

Introduction

This article contains a top 100 of the best management, leadership & personal development books. I have created this list using three different criteria:

- 1. number of Amazon reviews;
- 2. average Amazon rating;
- 3. number of Google hits;

Please refer to the second part of this article to find out how the calculations were performed.

#	Title / Author(s) / Tags	Year	ISBN13

Scope of this List

For this Top 100 list I have included only books covering subjects that might be of interest to (middle) managers, team members and employees interested in personal development, in any kind of organization. My main criterion for each book was: might this book help me and some of my subordinates to improve ourselves? (And would it help my managers solving their problems themselves instead of buggering me...)

This means that I have left out books with primary topics such as business strategy, investment, marketing, entrepreneurship, and the art of flower arrangement. These topics, though very interesting, won't be helpful in enabling the average *Joe the Programmer* to develop himself into *Joe the Leader* or *Joe the Communicator*. (The other reason is that I had to limit the scope, or I would never be able to finish the bloody thing.)

Finding the Books

To find all these potentially timeless classics, I checked the best-selling books in these Amazon categories:

```
Books > Business & Investing > Management & Leadership
Books > Business & Investing > Management & Leadership > Decision-Making & Problem Solving
Books > Business & Investing > Management & Leadership > Leadership
Books > Business & Investing > Management & Leadership > Management
Books > Business & Investing > Management & Leadership > Management Science
Books > Business & Investing > Management & Leadership > Motivational
Books > Business & Investing > Management & Leadership > Production & Operations
Books > Business & Investing > Management & Leadership > Quality Control
Books > Business & Investing > Management & Leadership > Systems & Planning
Books > Business & Investing > Management & Leadership > Teams
Books > Business & Investing > Organizational Behavior
Books > Business & Investing > Organizational Behavior > Organizational Change
Books > Business & Investing > Organizational Behavior > Organizational Learning
Books > Business & Investing > Organizational Behavior > Workplace
Books > Business & Investing > Skills
Books > Business & Investing > Skills > Communications
Books > Business & Investing > Skills > Running Meetings & Presentations
Books > Business & Investing > Skills > Time Management
```

After I found all best-selling books, I subsequently found many other books through the "Customers Who Bought This Item Also Bought" cross-reference thingy. That's how I finally ended up with a list of 400 books, and a pair of eyes with the color of Sarah Palin's dress.

Note: in case of multiple editions of the same book, only the most recent edition is listed on the chart, though reviews and ratings were combined for all available editions.

Doing the Calculations

Then it was time to do the calculations. I checked the number of customer reviews on Amazon, and I ranked the books according to these numbers (= a measure of quantity). I also calculated the average Amazon ratings, and I ranked the books according to these ratings (= a measure of quality). I then checked the number of Google hits for each of the books, and I ranked them accordingly (= a measure of popularity). Finally, I took the three rankings, and then re-calculated it into a final ranking. This resulted in the list you now have before you.

Note: this little project was performed in the first week of November, 2008. Current Amazon reviews and ratings might have changed since then.

I can guarantee that the system I used is *scientifically ridiculous*. Nevertheless, the results are quite interesting, and I'm sure this list can be of great help if you want to improve your skills as a manager, a leader, or as a human being who just wants to become a more interesting colleague. I suggest you start with number 1, and then slowly work you way down. However, you might want to start with <u>Breakthrough Rapid Reading</u> (by *Peter Kump*) and <u>How to Read a Book</u> (by *Mortimer J. Adler* and *Charles Van Doren*). These might help getting you through the list somewhat faster...

Profile

Jurgen Appelo is Chief Information Officer at ISM eCompany (www.ism.nl), recently rated as the #1 fastest growing technology company in The Netherlands. He leads a horde of 50 software developers, development managers, project managers, consultants, quality assurance managers, service managers and kangaroos, some of which he hired accidentally.

Jurgen is primarily interested in software engineering, quality improvement and complexity theory, from a manager's perspective. He is trying to write a book about this, and he keeps track of it on his blog (www.noop.nl). However, sometimes he puts it all aside to do some intensive programming himself, or to spend some time on his ever-growing collection of science fiction and fantasy literature.

Jurgen lives in Rotterdam (The Netherlands) -- and sometimes in Brussels (Belgium) -- with his partner Raoul. He has two kids, and an imaginary hamster called George.
